

Attn: Grade 10 Students

When the time comes to start thinking about preparing for your first year as official high school students, we have an important piece of information regarding the supplies you will need to be successful.

If you are planning to take Grade 10C math, a specific calculator is needed with graphing features on it.

We ask that you purchase the **TI-83 or TI-84** calculator. This calculator is directly linked to the course material that you will be receiving. (Pictured to the right).

Do not purchase the TI-Nspire. (Pictured to the right) It is more expensive and is not compatible with the material that will be given to you and that we will be working with.

Thank you,
Staff of KHS
